Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, it is not clear how the power spring drives the leg portion and arm portion. In line 7, it is not clear if the leg portions are disposed within the lower of the torso or attached to the lower of the torso. In line 8, there is lack of antecedent for the limitation "said main body". In line 16, it is not clear if the first leg portion is the same as one of the leg portions recited in line 2 of the claim. Further, inline 17, it is not clear if the second leg the same as one of the leg portions.

Regarding claim 2, there is lack of proper antecedent basis for the limitation "the first link member", "the first member" and "said toy main body".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cho et al (JP407227482A) in view of Morgrey.

Art Unit: 3714

Cho et al teaches in the figures most of the elements of the claimed invention, including first link members (30, par. 0014-0016), second link mechanisms (20), and the shift of weight of the main body is taken by positioning a center of gravity of the main body (par. 006-008). However, Cho fails to teach arm portions moved by driving means. Morgrey teaches in col. 11, par 2 that it is well known to have robotic mechanisms for enabling manipulation of the upper extremities such as the arms (55R, 55L), since such mechanisms are well known to persons skilled in the art of robotics. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate arm portions moved by driving means as taught by Morgrey to the toy of Cho et al for the purpose of simulating movement of human.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
